

REMARKS**Status of the Claims**

The Examiner has proposed claims 1, 7 and 23-24 as shown above. Applicants further propose the additional recitation of the species actinium-225 as shown in claim 1. As such, Applicants have added "bismuth-213" to the Examiner's claim 23 and also propose claim 25 which corresponds to claim 23, but recites that the specific activity of the actinium-225 conjugate is about 0.1 mCi/mg to about 0.15 mCi/mg.

Applicants submit that claims 1, 7 and 23-25, as presented herein, are in condition for allowance. Accordingly, Applicants request that claims 1, 7 and 23-25, be passed to issuance. If any issues remain, the Examiner is respectfully requested to telephone the undersigned attorney for immediate resolution.

Respectfully submitted,

Date: Dec 1, 2008
